

TM4Web - Welcome

TM4Web offers key TruckMate functionality on the web and allows continuous 24/7 interaction. Customers can perform essential TruckMate functions including tracking shipments, viewing inbound freight documents and open accounts receivable. Outside carriers and agents can view their load details on any load offers and/or history. TM4Web also offers full customization options to conform to your existing and growing business needs. As we add new functionality we'll keep you informed as to the progress, so you can customize the information you wish to see. Please talk with your Transportation Consultant to determine which TM4Web functions will suit your business best.

Clients/Customers - Key Benefits:

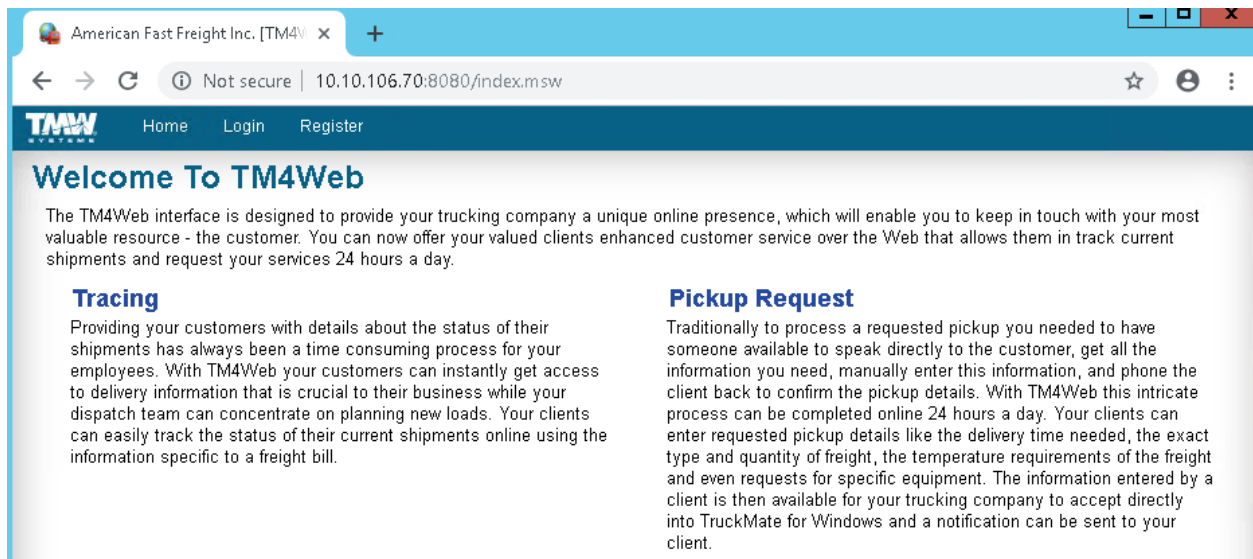

- Track and Trace shipments
- View Inbound Freight Documents
- View Accounts Receivable

Carriers/Vendors and Agents – Key Benefits:

- View Load Details on Load Offers and History
- Intuitive and easy to use

*** As new functionality becomes available, we highly encourage you to speak with your designated Transportation Consultant to determine which will best benefit your specific business needs, keeping you informed and up to date.*

Welcome to TM4Web

The TM4Web interface is designed to provide your trucking company a unique online presence, which will enable you to keep in touch with your most valuable resource - the customer. You can now offer your valued clients enhanced customer service over the Web that allows them in track current shipments and request your services 24 hours a day.

Tracing

Providing your customers with details about the status of their shipments has always been a time consuming process for your employees. With TM4Web your customers can instantly get access to delivery information that is crucial to their business while your dispatch team can concentrate on planning new loads. Your clients can easily track the status of their current shipments online using the information specific to a freight bill.

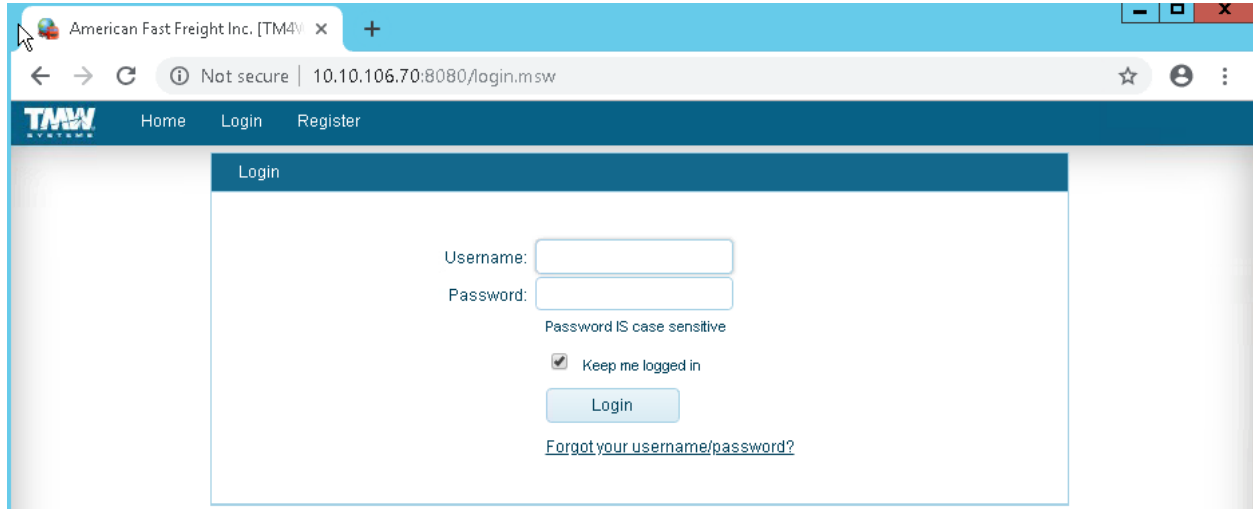

Pickup Request

Traditionally to process a requested pickup you needed to have someone available to speak directly to the customer, get all the information you need, manually enter this information, and phone the client back to confirm the pickup details. With TM4Web this intricate process can be completed online 24 hours a day. Your clients can enter requested pickup details like the delivery time needed, the exact type and quantity of freight, the temperature requirements of the freight and even requests for specific equipment. The information entered by a client is then available for your trucking company to accept directly into TruckMate for Windows and a notification can be sent to your client.

You will land on the above page where you will either select “Login” as an existing customer/vendor or if you have not yet been set up or gone through the registration process you will select the “Register” option.

Login Page for Current AFF Data Center Customers:

When selecting the “Login” option, you will be taken to the page below to enter your login credentials.

The screenshot shows a web browser window with the following elements:

- Button: Login
- Link: [Forgot your username/password?](#)

User name = Your own individual company email (lewisc@americanfast.com) **NOT** a general company email address (i.e. support@americanfast.com) with multiple users logging in.

Password = Welcome01

Access Code = Client ID from our previous Filemaker system (this will be needed for Registration purposes in setting up New Users within your company).

Registration Page for New Customers/Vendors

To begin the registration process, you must first request an access code from your Transportation Consultant. Once you receive this access code, you will be able to register your account on our website: <https://www.affdc.com/>

From the Home page, select the **Register** link at the top of the page.

This will take you to the Registration Information screen. You will need to enter all the required information (noted by the red asterisks * next to the fields). Once the form has been completed, select Submit.
