Odyssey

Complex Supply Chains Made Simple

Let's Get There Together.

Odyssey Logistics

Turn Your Logistics Partner into a Strategic Advantage

Odyssey Logistics helps businesses optimize supply chain performance by delivering fully integrated logistics solutions. We simplify end-to-end transportation with advanced technology, global expertise, and a wide network of services—3PL and 4PL managed services, multimodal transport, intermodal, warehousing, trucking, Jones Act ocean, and customs brokerage—so your goods move reliably, efficiently, and intelligently around the world.

Integrated Marine Logistics

With decades of proven performance in complex markets like Alaska, Hawaii, Puerto Rico, and Asia Pacific, Odyssey delivers reliable, end-to-end marine logistics solutions that reduce risk and drive results. Our deep local expertise, owned assets, and integrated technology platform are backed by a powerful multimodal network—enabling greater flexibility, efficiency, and control across every mile. By seamlessly connecting ocean, road, and rail, Odyssey helps shippers overcome challenges, avoid costly delays, and unlock long-term supply chain value in Jones Act shipping lanes.

Intermodal

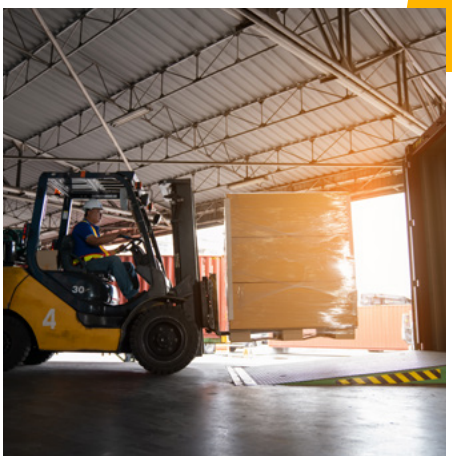

Odyssey is a trusted leader in intermodal rail solutions, helping shippers optimize cost, performance, and sustainability across long-haul freight moves. With a deep understanding of domestic and cross-border rail networks, Odyssey seamlessly integrates intermodal rail with over-the-road and drayage services to deliver scalable, end-to-end logistics. Our proprietary technology, operational expertise, and strong carrier relationships ensure greater visibility, fewer handoffs, and reduced risk, making Odyssey the partner of choice for intermodal efficiency and reliability.

Managed Services

Odyssey delivers comprehensive managed services that bring together strategy, technology, and execution. Odyssey helps shippers gain greater control, visibility, and efficiency across their supply chains, serving as a 3PL, 4PL, or consultative provider. Our experienced teams and advanced analytics drive smarter decision-making, while our flexible, mode-neutral approach ensures solutions are always aligned with customer goals. From day-to-day operations to long-term transformation, Odyssey is a trusted partner for organizations looking to streamline logistics and unlock new opportunities for growth.

Transport and Warehouse

Odyssey is the trusted warehouse partner for leading manufacturers and offers a powerful combination of transportation and warehouse services designed to streamline complex supply chains and improve operational performance. Odyssey provides fully integrated, world-class public warehouse and distribution services across North America, delivering scalable capacity, real-time visibility, and resilient performance. Our experienced team and advanced technology make us a trusted partner for businesses that demand reliability from the dock to the final mile.

Technology That Drives Precision and Visibility

With Odyssey's proprietary technology, you gain complete visibility into your shipping process, delivering insights that drive smarter decisions and cost savings. Acting as an extension of your team, Odyssey fills operational gaps so your people can focus on growth, not paperwork. Our fully integrated transportation solutions connect you to our vast global logistics network. Seamlessly working with your team and service providers, Odyssey technology tracks every step, captures critical data, and keeps you informed in real time. Adaptable and intuitive, Odyssey puts the answers you need at your fingertips, whenever you need them.

Unlock the Hidden Potential of Your Supply Chain

Odyssey technology can seamlessly and immediately impact your supply chain operations by improving:

Visibility

Access high-value insights you need to inform your supply chain strategies.

Digital Security

Advanced protocols and encryption techniques protect your data at all times.

Strategic Control

Make real-time decisions that leverage the power of our multimodal network.

Data Analytics

Advanced data analytics improve decision-making and resiliency.

Integration

Event-driven APIs let you control the flow of data.

Deep Expertise in Complex Markets

Odyssey is founded on the idea of simplifying complex logistics. We excel in highly regulated markets with special requirements. Our resilient transportation solutions are meticulously aligned with your industry's demands.

Transportation

Odyssey is a leader in freight movement to and from U.S. offshore markets and throughout North America. We provide smarter shipping options and just-in-time service, including transloading, drayage, flatbed, van trailers, and Conestoga for local and regional deliveries. Our LTL and FTL carrier network is designed to be flexible, agile, and dependable to keep your shipments moving. Whether shipping once a week or managing thousands of loads per month, Odyssey brings together technology, carrier partnerships, and hands-on expertise to give our customers a flexible, cost effective, and a transparent way to move freight.

Chemicals

Odyssey is a trusted partner for chemical shippers who demand precision, safety, and regulatory compliance. As an American Chemistry Council Responsible Care® partner, we manage hazardous and non-hazardous materials through our bulk tank network, ISO tank intermodal services, and chemical sample-fulfillment capabilities. From strategic warehousing to managed transport, we offer full visibility and end-to-end solutions designed to optimize cost, ensure environmental stewardship, and keep your supply chain running smoothly.

Metals

With more than two decades of experience in metals logistics, Odyssey offers specialized services for coils, sheets, tube, bar, and long products like roll-and-hold warehousing, flatbed and intermodal transport, and our patented Load & Roll Pallet (LRP) system. These capabilities protect product integrity and deliver consistent transit times with minimal handling. Transload facilities, rail-served warehouses, and direct contracts with Class I railroads and all major ports and equipment providers further drive cost efficiencies and excellent service across North America.

Warehousing

Odyssey understands the complexities of food and beverage logistics and has custom-built warehouses and distribution services and assets to meet the challenge. We offer cold chain warehousing, food-grade and intermodal transport, import and export transloading, cross docking, transload handling, packaging, and precise inventory tracking, as well as distribution solutions tailored for aluminum can and glass bottle manufacturers. When moving finished goods or ingredients to U.S. offshore markets or domestic hubs, our network delivers freshness, compliance, and reliability with customized documents and reporting.

Special Projects

When freight challenges exceed standard lanes or dimensions, Odyssey provides specialized project-freight expertise. We pair our flatbed and heavy-haul trucking capabilities with rail, intermodal, and marine options to design robust end-to-end solutions. From planning and permitting to transport and delivery, our cross-mode experience, compliance knowledge, and extensive carrier network ensure even the most demanding special projects arrive safely, on time, and within budget.

Safety Drives Our Culture

We believe being a great partner starts with delivering reliable service and adapting quickly to the needs of our customer. Our Environmental, Safety, and Governance (ESG) efforts are customer-driven. Odyssey prioritizes our HSSE (Health, Safety, Security, & Environment) culture. It's more than a policy; it defines how we operate. We integrate rigorous standards in everything we do. We employ structured procedures, ongoing training, transparent communication, and collaboration across stakeholders to ensure continuous performance improvement. Regular audits, measurable safety goals, and adherence to best practices permeate every aspect of our culture and our operations.

CloverLeaf™
Driving Sustainable Change **Supporting ESG**

Environmental, Social, and Governance

We built CloverLeaf™, our flagship sustainability program, in direct response to requests for better data to support Scope 3 emissions reporting. By harnessing actionable data across our transportation network, we make it easier for customers to reduce their environmental impact through reduced emissions, optimized routing, and minimized fuel consumption, without compromising on service, reliability, or value. Sustainability also extends to how we engage with our people and communities. We focus on delivering value to our customers as we continue building smarter, more sustainable supply chains.

Recognized as a Trusted Industry Leader

Odyssey is committed to excellence, safety, and compliance across every aspect of our operations. An array of organizations have certified that customers can trust Odyssey to handle their logistics with expertise, reliability, and integrity.

Our People Are Our Advantage

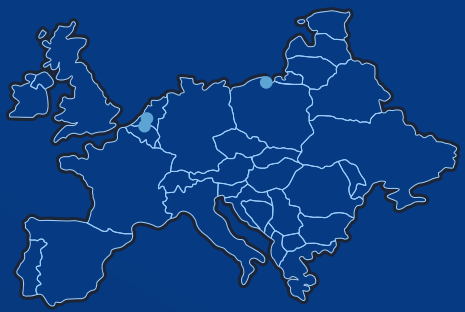

At Odyssey, our people are the driving force behind every successful shipment. With deep industry expertise and a commitment to problem-solving, our team works side by side with customers to design smarter, safer, and more efficient supply chains. The critical intelligence of our leaders informs the development of our technology solutions, meaning that every touchpoint, human or digital, is purpose-built to get your shipments to their destination faster and more efficiently. More than service providers, our team anticipates needs, solves complex problems, and delivers value at every stage of the journey, every day.

Harness the Power of a Worldwide Network

North America

Europe

Asia

- INTEGRATED MARINE LOGISTICS
- INTERMODAL
- MANAGED SERVICES
- TRANSPORT & WAREHOUSE

Services That Drive Supply Chain Growth and Efficiency
